

Looking to do more with Satori Infuse Web Services? Now you can.

Built for easy integration and maintenance, Satori Infuse Web Services offers a complete set of tools for the development of a contact data quality solution that meets your unique needs. Clean, update, correct, refine and enhance your contact records in any database. Satori Infuse works with nearly any application that collects, stores or interacts with your valuable contact data.

Existing Services	NEW Services
Validate your addresses with a USPS® CASS Certified solution that corrects spelling, verifies addresses, appends missing address elements and adds ZIP + 4 codes and carrier route data to your database. Leverage delivery point validation (DPV) as well to ensure each specific address exists and is deliverable.	Check your current contact phone numbers with US Phone Verification ensuring you have valid, active and useable phone numbers.
Validate addresses around the globe with International Address Correction (IAC) for over 240 countries and territories.	Improve digital communications by correcting misplaced or transposed @ signs, removing invalid characters and verifying email addresses with Email Validation to ensure your contact's email is accurate and linked to an actual working mailbox.
Update your records and maintain contact with your customers and prospects when they move using Move Updates with USPS® NCOALink®.	Add individuals or family emails to your contact database with US Email Append
Identify up to 20% more moves using sources other than USPS® NCOALink® data set with Extended Change of Address (ECO), including magazine subscriptions, catalog houses, insurance and credit companies.	Leverage your existing contact data with US Phone Append to add residential and business phone numbers to contact lists.
Identify key Head of Household information by replacing names and appending gender information.	Find an associated name and address with a 10-digit phone number with US Reverse Phone Lookup
Append residential unit numbers based on name and address using Apartment Append	Leverage US Address Geocoding to get the coordinates accurate to individual houses or commercial buildings at the address level.
Identify and filter out contacts that are outdated, inaccessible or unwanted with the Suppression Suite – including: Do Not Mail, Deceased and Incarcerated suppression lists.	Make sure you don't infringe on your contacts that have subscribed to the "Do Not Call" phone service.
Append and update Walk Sequence codes required for USPS High Density and Saturation postage discounts of up to \$0.08 per piece.	Ensure you avoid spamtraps and honeypots and comply with the DMA "Do Not Email List" and FCC wireless domains.
Collect contact data that is accurate to the ZIP + 4 level with US Centroid Geocoding to locate contacts within a few hundred feet.	

Leverage Satori Infuse Web Services to improve the quality of your contact data.
