NEOPOST

Send.Receive.Connect.

Fast, Easy, Compact

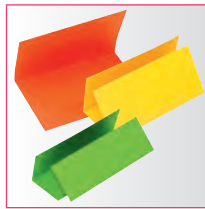

With the DS-35, manual folding, inserting and sealing mail can now be done in minutes, instead of hours. That means significant time will be available for other important tasks.

The DS-35 is easy to use. Load envelopes and documents, select a pre-programmed job and press start. With its compact size, this user-friendly solution fits any office environment.

A Versatile Workstation to Meet Your Needs

The DS-35 can handle a wide range of documents and envelopes, along with inserts or business reply envelopes (BRE).

You can choose between four fold types according to your requirements.

The automatic cascade feed function links feeders, reducing downtime and optimizing productivity. The daily mail function allows you to feed up to five sheets for each mailing project, stapled or not.

Mail Integrity and Accuracy

Neopost's double document control prevents double feeding. The system ensures you will always send the correct document to each recipient.

Easy Accessibility

With only one button to open the DS-35, there is quick and easy access to all parts of the folding area and paper path.

Automated For Optimal Mail Flow

The DS-35 can be connected to a Neopost mailing system to automate your entire mail flow. Fold, insert and meter your mail in one seamless step.

Environmental Commitment

The DS-35 carries Neopost's Eco-Label which aims to provide a clear and consistent set of environmental performance criteria used in the design phase of our products.

How We Reduce Our Environmental Footprint:

- Neopost limits the machine weight and the amount of raw materials used for production.
- The volume of our packaging is kept to a minimum and is 100% cardboard and recyclable.
- Packaging for the DS-35 represents less than 20% of the total weight of the packed product.
- The user-friendly sleep mode helps reduce energy consumption.
- We develop our products to ensure a minimum recyclability rate of 75%.

The Compact Solution for Folding and Inserting Your Mail

1. Document Feeders

Two document feeders provide increased versatility and productivity; collate separate sheets, alternate single document insertions between trays for long, unattended runs or manually feed up to five sheets.

3. Adjustable Catch Tray

The adjustable catch tray allows for processing of a variety of envelopes.

2. Insert/BRE Feeder

A special insert feeder allows for the insertion of business reply envelopes, marketing flyers, etc.

4. Touch Screen Display

The color touch screen makes operation easy and intuitive. Just load your documents and envelopes and let the software guide you. Its 15-job memory enables you to store the settings for all your regular mail runs.
