Your Mail Center Assistant

Easy-To-Use Folder Inserter
That Grows with Your Business

With the need to identify more efficient and productive ways to conduct business, companies are always looking for ways to adapt to their changing business requirements while saving time and money.

Ideally suited for businesses that want flexibility, the DS-85 folder inserter is designed to grow to meet the expanding needs of your mail center. From common business applications to unique combinations of documents, the DS-85 handles them all.

Automate Your Document Processing

Neopost's Output Management Software (OMS) will help you get the best out of each of your documents.

- Automatically add a barcode in the right place to drive your folder inserter

- Remove old OMR marks to give more value to your documents

- Select inserts from multiple trays

- Guarantee your mail integrity with secure control marks

- Split your print file based on number of pages

Environmental Commitment

The DS-85 carries Neopost's Eco-Label which aims to provide a clear and consistent set of environmental performance criteria used in the design phase of our products.

How We Reduce Our Environmental Footprint:

- Neopost limits the machine weight and the amount of raw materials used for production.

- The volume of our packaging is kept to a minimum and is 100% cardboard and recyclable.

- Packaging for the DS-85 represents less than 20% of the total weight of the packed product.

- The user-friendly sleep mode helps reduce energy consumption.

- We develop our products to ensure a minimum recyclability rate of 75%.

## Full Content Control and Security You Can Rely On

The DS-85 can read coding such as OMR and 1D barcodes. Furthermore, the code can be printed anywhere on the document. This unique feature provides full flexibility to fulfill any layout requirement.

In order to securely process personalized mail runs and those with a varying volume of documents per set, the DS-85 includes several automatic features to ensure that every recipient receives the right mailpiece.

- Reading of sequencing marks allows you to control printing accuracy, and inserts can be selected based on customer profile

- Optional Integrity checking software, Mail Piece Production Control (MPPC), ensures 100% accurate mail processing

3. Feeder Linking
Continuous operation is achieved by linking feeders. If one feeder runs empty, another one automatically takes over, allowing you to refill as needed until your job is complete.

1. High-Capacity Vertical Stacker
The high-capacity vertical stacker increases your productivity by holding up to 500 finished envelopes.

2. Touch Screen Display
The 5.7″ color display provides an intuitive wizard-based user interface for ease-of-use.

4. Carrier Envelope Hopper
Hopper capacity 325 envelopes.

A New Standard in Ease-of-Use

No need for trained operators thanks to two smart but simple Neopost inventions: the reversible color touch screen and automatic settings provide the operator with ultimate ease-of-use.

Simply load documents and envelopes and press the button to start. The DS-85 will adjust all settings automatically and save them to the memory for instant recall.

Smart Solutions to Maximize Mailroom Productivity

To avoid stoppages and maximize efficiency, the IntelliDeck diverts duplicate or faulty documents before folding while the system is still running.

The high-capacity vertical stacker requires less handling and makes it possible to unload up to 500 envelopes every 8 minutes while running at maximum speed.

Adapt Your System to Your Needs

2 stations   4 stations   6 stations

The DS-85 can be expanded from 2 to 6 stations at any time, providing additional capacity and protecting your investment. Simply add the right module at the right time – as your company grows. The multiple function options allow you to take on more job orders, further optimizing your productivity.

The modular design of the DS-85 gives you peace of mind and ensures that your equipment investment is cost-effective today and into the future.

Specifications

Processing speed	Up to 4,000 envelopes/hour
Automatic settings	Standard
FlexFeed multi-format feeder	Standard
Multi-sheet feeding	Standard
Cascade from all feeder	Standard
Document and insert feeders	Up to 6
Job memory	25
Manual feed	Standard
Document feeder capacity	Up to 725 sheets (20 lb.)
Envelope feeder capacity	325
MaxiFeeder capacity	1,200 sheets (20 lb.)
Fold types	Letter, z-fold, single, double parallel, no fold ⊿ ⊿ ∠ ⦉ ▁
Document height	3.5″ - 14″
Document width	5.1″ - 9″
Document weight	16 - 66 lbs.
Envelope length	3.5″ - 6.3″
Envelope width	6.3″ - 9.7″
Minimum set thickness	2.5 mm
Accumulate before folding	Standard
Tip-to-tip sealing	Standard
